## One Green World- New Plants 2017

SKU	Size	Name	Description
			Apples
			One of our favorites, this unique, New Zealand variety bears large, high quality, crisp and juicy fruit with
			deliciously tangy flesh. This is the variety we look for when we have to buy apples in the supermarket. Braeburn
0116	BR	Braeburn - Apple Semi Drawf	ripens in mid-October and can be stored until spring.
			Freedom Apple is a later-fruiting cultivar that produces a bright-red fruit with almost invisible yellow background
			and some patches of nettled russeting. With its subacidic, spright flavor, it is an excellent apple for fresh eating,
0134	BR	Freedom Semi Dwarf - Apple	cider or cooking.
			Very juicy and flavorful, this classic, early ripening variety makes the best cider and pies. Vigorous and reliable,
0142	BR	Gravenstein Semi Dwarf - Apple	Gravenstein produces abundant crops of lar
			Jonagold Apple is a later-maturing, medium to large, firm-fruited apple with yellow/green skin with red stripes
			and superb, rich, full flavor. It is the most common cultivar planted in Europe and an excellent hand-eating or
0146	BR	Jonagold Semi Dwarf - Apple	cooking apple.
			Melrose Apple is a beautiful, yellow/green skinned apple with dark red streaks and russet spots. Its firm, coarse,
			juicy, creamy-white flesh has a slightly acidic flavor and is very good for both cooking and in desserts. It continues
			to ripen off the tree and is best eaten after Christmas. One of the best storers, it can be kept until April at 31°F. It
			is the official Ohio State apple, where it has been planted extensively since its introduction in 1944. The tree itself
0152	BR	Melrose Semi Dwarf - Apple	is a vigorous, productive annual bearer with a spreading habit and moderate vigor.
			Mutsu Apple produces a large, round, yellow fruit with crunchy, juicy, tart flesh. Its distinctive, delicate, spicy
0154	BR	Mutsu Semi Dwarf - Apple	flavor has hints of anise.
			Pink Lady Apple produces an oblong, pink-blushed, yellow fruit with creamy, white, sweet-tart flesh that resists
0155	BR	Pink Lady Semi Dwarf - Apple	browning.
			Bright pink flesh, greenish-yellow skin, and rich, sweet-tart flavor distinguish this classic variety. Make delicious
			pink applesauce with this unique apple! Adding to its garden appeal is its spring display of bright pink flowers! Pink
0156	BT	Pink Pearl Semi Dwarf - Apple	Pearl ripens in late August and can be stored until January.
			Golden Russet Apple produces a gray-green to golden-bronze apple with crisp, flavorful, creamy, yellow flesh. It is
0180	BR	Golden Russet Semi Dwarf - Apple	the champagne of old-time cider apples.
			Gala Apple produces a large, golden-skinned fruit with heavy red striping with crisp, dense, aromatic, mildly acidic-
0181	BR	Gala Semi Dwarf - Apple	mildly sweet flesh.
			Pears
			Hosui Asian Pear produces a medium large, brownish orange fruit with juicy, sweet, fine-grained, crisp, off-white
0620	BR	Hosui Asian Pear	flesh that stores well through December.
0020			Kikisui Asian Pear produces a medium sized, smooth, round fruit with thin, green-yellow skin and white, sweet,
0625	BR	Kikisui Asian Pear	tart, juicy, crisp flesh. The skin is not russeted like most Asian pears.
			Kosui Asian Pear produces small to medium, faded yellow fruit with a slight bronze russet skin and crisp, crunchy,
0626	BR	Kosui Asian Pear	juicy, sweet flesh that ripens early and stores well into September.
			Yakumo Asian Pear produces an oblong to oval, smooth, shiny, pale yellow fruit with crisp, very juicy, sweet flesh
0770	BR	Yakumo - Pear, Asian	that is mildly melon-flavored.
			Red Bartlett Pear has an early harvest season and is a very vigorous easy to grow tree. The Fruit is medium to large
			in size with a red skin. The fruit is sweet and tender and perfect for fresh eating and canning. The fruit ripens
0901	BR	Red Bartlett	without cold storage.
			Luscious Pear tree is a mid to late season ripened. It produces small fruit with yellowish green skin. The pear is
0914	BR	Luscious - Pear	very juicy, sweet and firm. Tree is very hardy and resistant to blight.
			Moonglow Pear is an upright vigorous tree with large fruit that is soft and juicy with low acid. Store well and has a
0917	BR	Moonglow - Pear	mid harvest season. The tree is blight resistant.
			Summercrisp Pear is an early to mid-season ripened with fruit that is green with a very distinct red blush. The fruit
0941	BR	Summercrisp - Pear	is also very sweet and crisp. Summercrisp Pear is fire blight resistant.
00.11			Our Espalier Pear Combo is a 6 way- 3 tiered combination pear tree. Varieties used are Anjou, Bartlett, Bosc,
0980	BR	Espalier Pear Combo 6 Way-3 Tier	Comice, Flemish Beauty, Red Bartlett, Seckel.
			Persimmon
			A hard to find Asian Persimmon, Chocolate Persimmon, Maru, is a very unique Persimmon that when ripe has
4265	67		brown flesh that is very sweet. Chocolate Persimmon is an astringent variety so you have to wait for it to go soft
1305	SP	Chocolate Persimmon - Persimmon, A	
			A variation of the Fuyu persimmon, the Jiro Asian Persimmon is prized for it delicious flavor and attractive form.
1055			Jiro bears abundant crops of bright orange fruit that can be eaten while firm, like an apple, or allowed to soften to
1355	SP	Jiro - Persimmon, Asian	a tomato-like texture when it is even sweeter.
			Giant Fuyu Asian Persimmon is prized for its beautiful fall color and its abundant crops of striking, bright orange,
			sweet and flavorful fruit. Giant Fuyu is delicious eaten fresh and is also good for drying. It is ready to eat while it is
1366	SP	Giant Fuyu - Persimmon, Asian	firm like an apple but can be eaten when soft and sweeter.

			Forth standing and convertible Hashing Asian Destinances for this second ( ( ) ( ) ( ) ( ) ( ) ( ) ( ) ( ) ( )
1267	SP	Hachiva Borsimmon Asian	Early ripening and very reliable, Hachiya Asian Persimmon fruit is great for fresh eating (when soft) and it is also is
1367	51	Hachiya - Persimmon, Asian	one of the best for drying. It is ready to eat when soft and tender like a ripe tomato. A classic and very popular Japanese variety, Saijo Asian Persimmon is one of our favorites. An attractive, compact
1390	SP	Saijo - Persimmon, Asian	tree, Saijo bears abundant crops of conical-shaped, orange-red, very sweet and juicy fruit.
1550	51		Tamopan Asian Persimmon Tree is one of the largest persimmon trees which grows a very unique tomato shaped
			fruit that looks like it's wearing a cap. The fruit matures to a beautiful orange and is ready to eat when soft like a
1395	SP	Tamopan - Persimmon, Asian	tomato. Great for fresh eating or made into a jam.
			Selected for its large, sweet and delicious, deep-orange fruit, Garretson is also prized for its striking, orange-yellow
1412	BR	Garretson - Persimmon, American	fall foliage. While partially self-fertile, planting Garretson with a Male Persimmon will ensure heavy crops.
			Another new variety, Prairie Dawn ™ American Persimmon produces beautiful, orange-yellow fruit, that is not
1450	BR	Prairie Dawn - Persimmon, American	only early ripening, but also delectably sweet, firm, and delicious.
			Plum
			Beauty Plum is a widely adapted, self-fertile, and early ripening fruit tree. The medium sized purple skinned plums
1500	BR	Beauty - Plum	hold a shocking and captivating surprise inside with their unique flesh of amber and ribbons of red.
			Blue Damson Plum is a great plum for fresh eating but is more tart than sweet making it great for jams, jelly, or
1501	BR	Blue Damson - Plum	pruning.
			French Prune Plum is a mid season, self-fertile, mild flavored, deep reddish black plum. When looking for the
1507	BR	French Prune - Plum	optimal plum for canning or drying the French Prune Plum is a wonderful choice.
			Methley Plum is a cultivar of a Japanese plum that is small and upright with just enough of a spreading form to
			make this an absolutely beautiful tree. It produces heavy, annual crops of juicy, sweet, red purple fruit. The fruit is
1508	BR	Methley - Plum	juicy, sweet and mild with a distinctive flavor which is good for fresh eating or jelly.
			Seneca Plum is a yellow, free-stone fleshed fruit with blueish red skin. Used fresh or preserved, this is a crack and
			brown rot resistant plum. Upright, vigorous, and productive fruit tree requiring pollination with other European
1509	BR	Seneca - Plum	plums.
			Elephant Heart Plum is a heart-shaped, juicy, free-stone plum with deep red flesh and purple skin. They have a
1510	BR	Elephant Heart - Plum	very pronounced flavor and are fantastic for almost any application.
			Early Italian Plum is a hardy and vigorous mid season plum, with a oblong shape and freestone flesh. Great for
			eating fresh or preserving, the sweet flavored plums flesh turns from yellow green to a rich red wine color when
1529	BR	Early Italian - Plum	cooked. This is a self-fertile tree great for commercial production.
			Rosy Gage is a unique fresh-market plum bred by the late John Watson at the Cornell-Geneva research station.
1536	BR	Rosy Gage - Plum	Hybrid of the famed European variety Imperial Epineuse and an unknown parent. Yellow-green skin with a pink to rose colored blush when sunlight is adequate.
1330	DK		Toka Plum, also known as Bubblegum Plum, produces very sweet, and juicy reddish bronze colored plums with a
			yellow flesh. This plum originated in South Dakota in the early 1900s and is said to withstand temperature as low
1549	BR	Toka - Plum	as -50° degrees F.
			Peaches and Nectarines
			This unique peach was discovered as a chance seedling in Washington State, near Seattle. Peach 'Avalon Pride'
1607			bears pretty pink flowers followed by large, deliciously juicy fruits from early August
1607	BR	Avalon Pride - Peach	
	BR	Avalon Pride - Peach
